MECHANICAL BROOM

MECHANICAL ROAD SWEEPER

These road broom sweepers are equipped with nylon bristles for efficient, fast and durable cleaning of road. In some cases steel wire type bristles can also be provided with the same. Customers can also make combination of nylon and steel bristles. This road cleaning broom is preferred by a lot of road contractors for its ease of operation. As the machine works, dust is being collected on one side of the road.

It can be conveniently moved by attaching at the rear of a tractor.

Operating and maintenance is easy & does not require skilled labour.

All the parts used are highly durable & suited for tough Indian conditions.

Its cleaning width is 2.10 mtrs.

Screw type handle to adjust the operating height & pressure of the mechanical broom. There are a total of two such handles for adjustment of operating height /slope. The screw type handle at the center is for pressure adjustment.

Standard Gear Box ensures that the brush moves with the tractor.
The chain drive mechanism is responsible for the movement of the axles

Nylon bristles of 2.5 mm thick ensure performance and durability.

Rubber covering at the rear of the road sweeper ensures low dust emission.
